

Key Features H480

- Longer upper knives: easier to pick up logs.
- Pins of back knives in "lower" position, than with 758. Better holding of bigger Ø stems.
- New Danfoss high pressure TMTW/TMVW(MS 08) feed motors with fixed flanges for feed roller fastening.
- Tilt frame: new covers & stainless steel tanks.
- New Evo 2 valve. Designed for higher pressures.
- Settings adjusted from TM300: no manual pressure adjustments.
- Proportional saw block; Meter Out saw control.
- Options included in main valve.
- Optimized oil flow through valve.
- Hydraulically opened top knife option.
- Spring loaded back knife option.
- Best tested head ever. 15 units out. Oldest over 7.000 hrs., average 2.000 hrs.
